
Software Developer / Programmer

This is an exciting opportunity to work with a small dynamic successful computer software company and to work as part of a small dedicated software development team.

Responsibilities will include web site development/maintenance, SQL database administration projects and involvement with core special projects for our mainstream software product.

The candidate does not necessarily need prior work experience.

About Rushcliff Ltd:

- A small dynamic software development company currently with 8 employees
- Developer of UK's leading software package supplied to a variety of private health care professions such as Physiotherapy, Osteopathy, Private Health Clinics, Alternative Therapy Clinics, etc.
- Software Used by approximately 5000 practitioners and staff across 2000 clinics in the UK and also sold to many clients internationally
- Bright spacious informal working environment located within Bretby Business Park – Burton on Trent

About the Role:

- Web site development and maintenance for company's own web site – including integration with on-line booking, purchasing and payment options.
- MS-SQL & MySQL database administration and DBA software development – for existing and new databases
- Involvement in special development projects for our mainstream product – development of specialist add-on software modules for our existing large database system.
- Technical / 2nd line support for our existing client base via telephone / e-mail / remote access.

What Rushcliff are offering

- full internal training in existing software products and their use by our clients
- training in company procedures and protocols
- salary will depend upon experience
- an excellent opportunity to develop and grow as our company grows
- opportunity to develop further skills including .NET

The candidate must:

- be bright, enthusiastic and willing to learn
- be ambitious
- have good literacy and numeracy skills
- be articulate
- have a good telephone manner
- be able to work as part of a small team and liaise with other internal departments
- have a good general working knowledge of Microsoft Windows™ and Microsoft Office products.
- have good general working knowledge of peer-to-peer networks, domain-based networks and internet protocols.
- have the following beneficial skills:
 - Web development skills (HTML, PHP, JavaScript). Note: Web design / graphic design skills NOT essential.
 - MS-SQL / MySQL DBA knowledge
 - programming language skills in VB, VFP, Java, C# (not all essential).
